Press Release

IT, AI integration with HSE compliance

Grow Safe, Silicon Technologies Join Hands

In a landmark development, Grow Safe and Silicon Technologies have signed an MoU to foster innovation through the integration of IT and AI with HSE [Health, Safety & Environment] compliance in the country's corporate and industrial sectors.

The strategic alliance aims to empower industries with AI-powered safety solutions and cutting-edge, tech-enabled business models that fulfil both legal and social compliance expectations. The collaboration is expected to set new benchmarks in creating safer, smarter, and more sustainable industrial environments through automation, real-time monitoring, and intelligent process management.

Speaking on the occasion, Mubeen-ul-Haq, CEO Silicon Technologies, highlighted the critical need for fire safety and risk mitigation in modern data centres. He emphasized that the fusion of advanced IT infrastructure with proactive HSE practices will be key to achieving operational continuity and resilience.

Saad Abdul Wahab, CEO Grow Safe said, "This collaboration will revolutionize traditional industrial practices. By integrating AI and automation into HSE systems, we aim to improve traceability, process visibility, ownership, and overall resource efficiency. It's a significant step toward digital transformation and sustainable safety management."

Besides the CEOs, Silicon Technologies was represented by Chief Business Officer Numair Zaheer and Manager Data Centre & Power Salman Raza Khan, along with members of the corporate team, while the GSPL staff included Director HR, Sales & Marketing Hamdan Siddiqui, GM Technical & Inspections Usman Dawood Barry, Head of International Trainings & Certification Shayan Ahmad, and Head of Fire Safety Zubair Minhas.

Silicon Technologies is one of Pakistan's premier institutions addressing the growing needs of Information Technology, industrial automation, and AI integration—with strong affiliations to global technology partners. On the other hand, Grow Safe is Pakistan's leading provider of HSE training, audits, certifications, and industrial safety consultancy, serving various sectors including manufacturing, construction, energy, and pharmaceuticals.

With this MoU, the organizations are set to redefine the future of tech-driven safety and compliance solutions across Pakistan's industrial and information technology landscapes.

Thankfully,

Hassan Siddiqui
